

## CHRISTIAN SZCZESNIAK

As both a dedicated professional musician and an experienced IT technician, I bring a well-rounded combination of creativity, technical skill, and practical decision-making to the Rainbow Bay community. With decades of experience running my own business, I've developed a deep understanding of budgeting, planning, and accountability. My work providing IT support for government agencies and community organizations has strengthened my ability to communicate clearly, solve problems efficiently, and focus on long-term, reliable solutions. Having lived in Rainbow Bay, Eleuthera, for 20 years, I truly consider this community home. Throughout that time, I've volunteered with local churches, music programs, and other service-oriented groups, gaining hands-on experience in collaboration, community engagement, and leading with respect. As a professional I was responsible for the Music program at Windermere High School for 3 years and my primary source of work is as a composer of original music for advertising, film & television. My family has also been actively involved in the area for many years, and we are grateful to be well known and well regarded by our neighbors both foreign and domestic. That long-standing connection inspires me to help protect and support the place we all love. I am highly organized, detail-oriented, and firmly committed to avoiding wasteful spending — especially when working with community funds. If elected to the **Rainbow Bay Property Owners Association** board, I will prioritize transparent communication, responsible financial management, and timely attention to resident concerns. My goal is to support improvements that truly enhance our quality of life while preserving the unique character, stability, and sense of community that make Rainbow Bay such a special place to live. I would be honored to serve and put my experience, integrity, and dedication to work for all residents of Rainbow Bay.
